From Used Oil to Value

Enviroflex delivers advanced systems for used lubricating oil re-refining, base oil polishing, transformer oil regeneration, and vacuum oil purification.

ReLubeX™

Used lubricating oil re-refining systems for recovery of valuable base-oil fractions, fuels, and by-products.

POLISHLUBE™

Base oil polishing and finishing for sulfur reduction, color improvement, odor reduction, and quality upgrading. Suitable for API Group II and Group I+ finishing and paraffin/wax decolorization applications.

TURBOSORB™

Proprietary reactivatable activated adsorbent for efficient contaminant removal.

ReGenX™

Transformer oil purification and regeneration systems.

RePureX™

High-vacuum oil purification units for electrical and industrial oils.
